

Grinding · deburring · polishing

Abrasive belt grinding machine

Typ KS 100 BA

Application areas

Grinding and polishing of cylindrical parts from 6 - 800 mm, made of steel, aluminium, paper, plastic, CFK, GFK

Industries: Metal construction, metal working, metal grinder

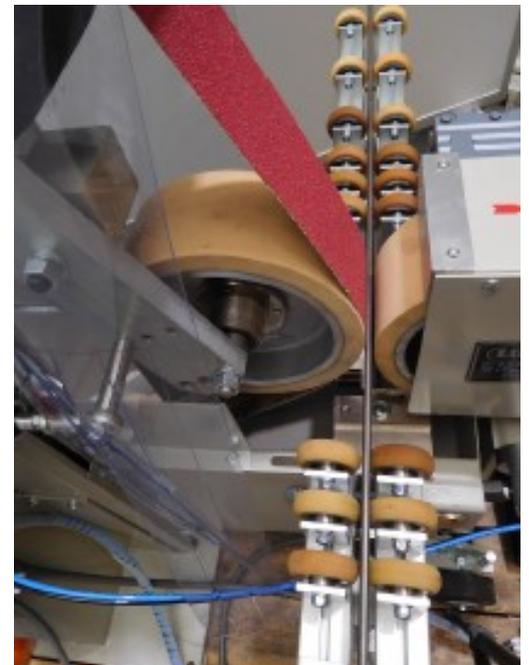

BA unit

Pneumatically supported contact wheel & BA

Support rail height adjustable

Special benefits

- Simple operation
- High surface qualities are quickly achieved
- Fast tape change
- 3-roller system allows constant cutting speeds with different contact roll diameters
- Pendulum unit for tolerance compensation Diameter up to 800 mm
- Pole-changing brake motor, optionally with frequency converter
- Selectable roller tables and support channels according to diameter and workpiece weights, optionally adjustable
- Belt widths of 50, 75, 100 mm can be used
- Belt length 3,500 or 4,000 mm Hold-down device optional
